

Definitions

Hand Definition - My definition of "Hand" is the Hand listed on the card, plus each of the variations of that line. For example, if a hand says "Any 3 consecutive numbers", each of the consecutive number variations is listed as a separate hand. I don't consider different suits a different hand, but different numbers are.

Line Number - The number in front of each hand is the line from the actual card in each category. If there are 2 hands on the same line on the card, they are listed as line numbers 1 and 1b.

Example: If the first line under the 2468 Category reads:
222 4444 666 8888 or **222 4444 666 8888**

Their line numbers are:

1. 222 4444 666 8888

1b. **222 4444 666 8888**

What's on the site:

1. **Summary of Hands - Card Comparison**

Reports summary data on tile value usage, showing the frequency of hands containing each tile value and hands in each card category. Categories also include Number Only hands, hands with Flowers, hands with Dragon, hands with both Dragons and Numbers, hands with Dragons and Winds, and hands with Flowers & Winds.

2. **2026 card**

These 3 pages have a blue bar at the top and are titled 2026 Card. They have the categories on that page at the top. It's just like the card but all the variations of a hand are typed out to the right of the hand. If a line has more than 3 variations, the variations will be shown below the first line, but with the same line number. I can only fit so much on a Letter size page.

3. **Finding the Perfect hand**

This 2 sided page shows all the hands with every variation. I use this instead of the card when I play. They are sorted in a way that makes it easy to find your best hand. The first column shows all the hands with only numbers (no flowers, winds or dragons). The second column shows all the flower hands. The third column shows all the hands with winds. On the back side are all the dragon hands. Print this on 1 sheet, both sides. Use this after all the tiles are dealt and you are looking at all your tiles to find a hand. For example, if you have several flowers and even numbers, scan down the flowers column and look for the 2468 category hands

4. **Pattern Report**

This shows the most popular hand patterns for 2026. The first page has the pattern and the number of hands with each pattern. The rest of the report shows all the hands under each pattern. It compares 2025 and 2026 hands.

7. **Suits Report**

Shows all the 1 suit, 2 suit and 3 suit hands.

8. **Pairs, Pungs, Kongs Report**

This shows each tile value and the number of hands it appears in as a pair, a pung, and a kong. It also breaks down the winds separately. It also lists the potential number of jokers you could use in each hand. Although there are only 8 jokers in the game.

9. **Sample Hands**

Shows samples of each hand and variation. Sorted by Category and line number.
